

## Professions Regulated by Law or Public Authority

Professions Regulated by Law or Public Authority are professions where there is a regulatory requirement to register with a competent authority prior to practising that profession. In accordance with the Directives, it is the responsibility of the regulatory authority for the profession to assess a professional's prior training and experience, to determine whether they are suitably qualified to practise. If your profession falls into this category and you would like to practise in the UK, it will therefore be necessary to contact the professional authority directly.
